

WORK SHEET - 06

HINTS & SOLUTION

Q.1 (D)

Q.2 (D)

As for its preparation we have to take $\text{CH}_3-\text{CH}=\text{CH}-\text{X} + \text{CH}_2=\text{CH}-\text{ONa}$ or $\text{CH}_3-\text{CH}=\text{CH}-\text{ONa} + \text{CH}_2=\text{CH}-\text{X}$. But in either case ether will not be prepared as in both cases there are vinylic halides.

Q.3 (C)

Q.4 (C)

$\text{SOCl}_2 \rightarrow$ Retention of configuration $\rightarrow \text{S}_{\text{N}}\text{i}$ mechanism
 $\text{PCl}_3 \rightarrow$ Inversion $\rightarrow \text{S}_{\text{N}}2$ mechanism

Q.5 (B)

Q.6 (C)

Q.7 (C)

Q.8 (B)

Q.9 (D)

Q.10 (C)

Q.11 (B)

Q.12 (A) (C) (D)

B.E. $C-D > C-H$

H effect $H > D$

Stability $CD_3-CH=CH_2 < CH_3-CH=CD_2$

Q.13 (A) (B) (C)

A,B,C all capable of giving S_N1

Q.14 (A) (C) (D)

(A), (C), (D)

Q.15 (B) (C) (D)

(B) in SN_2 inversion takes place

(C) $R-OH + SOCl_2 \rightarrow RCl + SO_2(\uparrow) + H(\uparrow)$ because by product are in gaseous state so reaction goes in forward direction.

Q.16 (A) S, (B) P, (C) R, (D) Q

Q.17 3

Q.18 4
